Hi,

I'm interested in joining with Aconex family as a Software Developer, as I believe that my background, qualifications and work experience could make a significant contribution to Aconex. I've been fortunate to have found the Agile occupation I love - developing.

My ability to solve problems is my greatest asset and is a quality I think can really enhance the Software Development Team and benefit to Aconex. My experience in Software Development has defined my analyzing and developing skills. In addition, a solid background in algorithm performance enables me to perform effectively.

For your reference I have enclosed my candidature profile with this mail. I am excited about the possibility of a personal interview to further discuss my qualifications with you. I can be reached at **subramaniam.s17@gmail.com** or **+91 94802 00530**. Thank you for your valuable time to review my candidature profile and to consider me for employment at Aconex.

Thanks & Regards,

Subramaniam S.
